

## Program Outcomes

- (1) **Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- (2) **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- (3) **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- (4) **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- (5) **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
- (6) **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- (7) **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- (8) **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- (9) **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- (10) **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- (11) **Project management and finance:** Demonstrate knowledge and understanding of the engineering, and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- (12) **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

## Program Specific Outcomes

**The Program Specific Outcomes (PSOs) of Electronics and Communications Engineering Department are:**

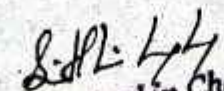

**PSO1:** The ability to absorb and apply fundamental knowledge of core Electronics and Communication Engineering subjects in the analysis, design, and development of various types of integrated electronic systems as well as to interpret and synthesize the experimental data leading to valid conclusions.

**PSO2:** Competence in using electronic modern IT tools (both software and hardware) for the design and analysis of complex electronic systems in furtherance to research activities.

**PSO3:** Excellent adaptability to changing work environment, good interpersonal skills as a leader in a team in appreciation of professional ethics and societal responsibilities.

  
DIC, ECE Deptt.  
HETC, Hooghly.

  
Principal in Charge  
Hooghly Engineering & Technology College  
Vivekananda Road, Pipulpati, Hooghly.

## PSO Of EE Department

### Program Specific Outcome (PSO)

PSO 1: Able to apply the knowledge gained during the course of the program from Mathematics, Basic Computing, Basic Sciences and Social Sciences in general and all electrical courses in particular to identify, formulate and solve real life problems faced in industries and/or during research work.

PSO 2: Able to provide socially acceptable technical solutions to complex electrical engineering problems with the application of modern and appropriate techniques for sustainable development.

PSO 3: Able to apply the knowledge of ethical and management principles required to work in a team as well as to lead a team.

83  
Principal in Charge  
Hooghly Engineering & Technology College  
Vivekananda Road, Poppara, Hooghly.

## **Program Specific Outcomes (PSOs)**

- PSO 1:* To excel in professional career & higher education by acquiring knowledge in mathematical computing and engineering principles.
- PSO 2:* Analyze real life problem in developing economically feasible and socially acceptable solutions of engineering problems.
- PSO 3:* To excel in professionalism, ethical and moral conduct and interpersonal skills and communication adaptable to current trends in technology as well as change in technology.

## Program Specific Outcomes (PSOs)

The Program Specific Outcomes (PSOs) of C.S.E. Department are:

**PSO 1:** Able to apply the knowledge gained during the course of the program from Mathematics, Basic Computing, Basic Sciences and Social Sciences in general and all computer science courses in particular to identify, formulate and solve real life complex engineering problems faced in industries and/or during research work with due consideration for the public health and safety, in the context of cultural, societal, and environmental situations.

**PSO 2:** Able to provide socially acceptable technical solutions to complex computer science engineering problems with the application of modern and appropriate techniques for sustainable development relevant to professional engineering practice.

**PSO 3:** Able to apply the knowledge of ethical and management principles required to work in a team as well as to lead a team.

**PSO 4:** Able to comprehend and write effective project reports in multidisciplinary environment in the context of changing technologies.

# Hooghly Engineering & Technology College

## Civil Engineering Department

### Program Specific Outcomes

**PSO1: Competence in Civil Engineering:** Educating students with fundamental mathematical, scientific, and engineering knowledge to have a significant and positive long-term impact on the field of civil engineering.

**PSO2: Usage of Cutting-Edge Technology:** Inspiring students and preparing them for successful professional careers using appropriate techniques, resources and modern attitudes and modeling to complex engineering activities and research.

**PSO3: Ability to Coordinate and communicate in groups:** Emphasizing the importance of working in a team effectively and to communicate properly within the team to achieve the desired outcome.
